Shell Shuffle Review

Design and art handoff for Fable to specify the Opus build. October 24, 2026.

The first page is a proposed play screen using the delivered art. Full implementation rules, asset contracts and acceptance tests are inside the ZIP at **extras/fable_start_here.md**. This is not an implemented or published build.

Feel and juice

1. Give every round a readable rhythm

What and why Use a 1400 ms preview, 220 ms cover and 180 ms settle before guessing. Make the reveal feel earned with a short lift and a clear hold.

Where on screen Main play area, from Start to the cup reveal.

Effort M **Priority** 1 SS-01

2. Replace the speed cliff

What and why Start with three cups and three 920 ms swaps. Cap at five cups, fourteen swaps and a 420 ms floor. Use one adjacent pair at a time.

Where on screen Main stage; replace the ramp described in the brief.

Effort M **Priority** 1 SS-02

3. Keep the answer honest

What and why Stable cup IDs carry payloads through a precomputed plan. Use identical skins within each round and lock input outside Guess. Never move the answer after the shuffle.

Where on screen Cup renderer, input gate and round controller.

Effort M **Priority** 1 SS-03

4. Make a miss recoverable

What and why Classic has three attempts. A miss reveals the answer, resets the streak and retries the same level with a fresh plan. Earned coins remain banked.

Where on screen Current Wrong cup message and Play Again area.

Effort M **Priority** 1 SS-04

Modes and depth

5. Make Classic the welcoming anchor

What and why Keep the simple watch and choose loop. Track completed levels and longest streak, with an untimed guess and voluntary End run.

Where on screen Mode picker default and Classic results.

Effort M **Priority** 1 SS-05

6. Add the shared Daily Shuffle

What and why Five seeded rounds at levels 1, 3, 5, 7 and 9. Same UTC date and ruleset give the same plans. First attempt scores; later plays are Practice.

Where on screen Home mode card, Daily status and result card.

Effort M **Priority** 1 SS-06

7. Add Two Treasures

What and why Hide a marble and star under four cups. Commit two distinct choices together, with no early reveal. Shape differences make the rule work without color dependence.

Where on screen Mode picker, target prompt and two selected cup outlines.

Effort M **Priority** 2 SS-07

8. Add Empty Cup and Practice

What and why Empty Cup hides marbles beneath every cup except one. Practice offers slower motion and retries without rewards, pressure or scored records.

Where on screen Mode picker, target prompt and Practice pace controls.

Effort M **Priority** 2 SS-08

Progression and collecting

9. Turn the shop into a collection

What and why Add Cups, Treasures and Places tabs with Owned, Available and Goals filters. Preserve all existing items and make cup rotation optional.

Where on screen Observed Shop list, above its 70 cup grid.

Effort M **Priority** 1 SS-09

10. Make the next reward visible

What and why Pin one collection goal to Results. New Honey, Sleepy Cat and Starlight cups cost 120, 160 and 220 coins. Every purchase is explicit and guaranteed.

Where on screen Collection detail and the bottom of Results.

Effort M **Priority** 2 SS-10

11. Reward play without betting

What and why Correct rounds earn capped coins; misses never remove them. No paid currency, wagers or paid continues. The complete game is the proposed one time purchase.

Where on screen Coin HUD, item purchase controls and results summary.

Effort S **Priority** 1 SS-11

12. Protect existing players

What and why Migrate balances, owned items, custom balls and streak prizes. Award each round once with a transaction ID; keep a recoverable pre-migration backup.

Where on screen Save layer, rewards and collection ownership.

Effort M **Priority** 1 SS-12

Screens and UI

13. Put the table at the center

What and why Replace the empty start field with the illustrated title plate. In play, give the cups a bounded stage and stable baseline above the main action area.

Where on screen Main screen between the title and Start button.

Effort M **Priority** 1 SS-13

14. Give a run a real ending

What and why Show completed levels, accuracy, streak, earned coins and goal progress. Add Play again, Collection and a player-initiated local share action.

Where on screen Replace the one-line miss and isolated replay button.

Effort M **Priority** 1 SS-14

15. Build for narrow phones

What and why Use at least 48 px touch targets and 14 px secondary text. Collapse the logo region on shorter phones. Validate 360, 375 and 412 px widths.

Where on screen HUD, cup hitboxes, modal close buttons and bottom navigation.

Effort M **Priority** 1 SS-15

16. Add settings and reliable suspension

What and why Provide sound, music, haptics and reduced effects controls. Pause on interruption without advancing unseen swaps; process recovery becomes an assisted attempt.

Where on screen New Settings panel and existing shuffle Pause control.

Effort M **Priority** 1 SS-16

Art and look

17. Adopt the Midnight Cabinet

What and why Walnut, plum curtains and warm upper-left light create a place. Sage, antique gold and cream keep the cozy scene connected to the studio midnight palette.

Where on screen Full background, table, mat and title scene.

Effort M **Priority** 1 SS-17

18. Use tactile collectible cups

What and why Four core cups and three new themed cups share a consistent canvas and baseline. Skin changes happen between rounds; every cup in a round matches.

Where on screen Stage cups and Collection previews.

Effort M **Priority** 1 SS-18

19. Make treasures worth displaying

What and why The glass marble, star, acorn and six painted toys give the collection character. Earned toys can replace the hidden object in Classic.

Where on screen Treasure tab, unlock presentation and Classic reveal.

Effort M **Priority** 2 SS-19

20. Let places be progression

What and why Unlock the greenhouse, carnival and observatory after 30, 80 and 150 wins. Use the same stage coordinates in every room. No dealer or hands in this release.

Where on screen Places tab and background layer behind the stage.

Effort M **Priority** 2 SS-20

Sound and music

21. Give swaps a soft rhythm

What and why Use the supplied slide, settle and lift cues with identical behavior across cups. No audio cue may reveal which cup holds the treasure.

Where on screen Each shuffle transition and cup lift.

Effort S **Priority** 1 SS-21

22. Make outcomes audible and gentle

What and why Use a short rising win cue, softer miss cue and one coin award sound. Limit concurrent voices and avoid one sound per counted coin.

Where on screen Reveal, coin total and unlock card.

Effort S **Priority** 1 SS-22

23. Coordinate with the existing soundtrack

What and why The live page exposes a shared Music control. Integrate one music controller; the supplied quiet loop is optional and must not play over the studio soundtrack.

Where on screen Existing Music chip and new Settings panel.

Effort M **Priority** 2 SS-23

24. Respect quiet play

What and why Initialize audio after a gesture, persist separate sound/music/haptic settings, and test silent mode. Every audio event also has a visible equivalent.

Where on screen First interaction, settings storage and feedback system.

Effort S **Priority** 1 SS-24

Daily and retention

25. Replace streak pressure with visit stamps

What and why Keep seven familiar rewards but advance them cumulatively. Missing a day does not reset progress. Count visits after play rather than an empty launch.

Where on screen Daily Rewards calendar and flame label.

Effort M **Priority** 1 SS-25

26. Give every toy a second route

What and why Use total visit days or play milestones to unlock the six toys. Keep every already earned prize and remove consecutive-day requirements.

Where on screen Locked toy descriptions in Collection.

Effort S **Priority** 1 SS-26

27. Make returning an invitation

What and why Reminders remain off until deliberately enabled. Explain the next reward without urgency. Daily practice remains available after the scored attempt.

Where on screen Settings reminders, Daily card and post-run message.

Effort S **Priority** 2 SS-27

28. Keep shared currency consistent

What and why Preserve Sunbeam event amounts and the shared daily cap only through the existing authoritative service. Deduplicate retries and keep offline play available.

Where on screen Studio currency adapter and reward transaction boundary.

Effort M **Priority** 1 SS-28

Bugs you saw

29. Repair unnamed cup controls

What and why At the Guess phase, the observed accessibility tree did not expose named cup buttons. Give stationary slots button semantics without announcing hidden answers.

Where on screen Live main stage after the level 1 shuffle.

Effort M **Priority** 1 SS-29

30. Remove forbidden punctuation from UI copy

What and why The observed start and miss strings contain exclamation marks. Replace them with the approved calm strings and lint all player-facing text for dashes and exclamation marks.

Where on screen Start status, guess prompt, miss status and legacy item labels.

Effort S **Priority** 1 SS-30

31. Replace red and green result halos

What and why The observed miss uses red and green cup halos. Add check/empty-ring symbols and explicit result text so outcome identification never relies on hue alone.

Where on screen Live miss reveal around selected and correct cups.

Effort S **Priority** 1 SS-31

32. Separate observations from release testing

What and why No crash was observed. Live inspection was desktop only; phone layouts are proposals. Fable must assign the physical-device, interruption and save-migration checks in the included handoff.

Where on screen Fable build brief and Opus release checklist.

Effort M **Priority** 1 SS-32

Direction index

Machine-readable array. The same array is included as extras/review_directions.json.
